FORM A.
BRITISH RAINFALL.

# REGISTER OF RAINFALL IN 1917

*Kept at* Benson Observatory
*in the County of* Oxfordshire
*by* W. H. Dines

Lat. Long.
Time of Observation
Nearest Railway Station
Diameter of Funnel of Rain Gauge in.
Height of top of Gauge above Ground ft. in.
" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Dear Sir

I am obliged to you for your card, which I return to you, as it will at once bring to your mind the circumstance.

With regard to the record of July 3rd I am unable to give you any information, as I only record the heaviest rainfall in each month in my book - The daily

Sheet I sent to you in January -

I regret that it appears from your letter that I made an error in the addition of the rainfall for Dec: last, which I have corrected in my book - I send you my book for your inspection - but I shall be glad to have it returned at your early convenience as I often require to refer to it -

Yours faithfully

J. F. Starkey

This is my rough copy I have mislaid the other one

9,000, IX. '10.

P. T. Odon

N.B. Rains this year were very partial \
on some parts of my Estate heavy rain
occurred when at the other end there was
none – Reading only 4 miles distant
(as the crow flies) having in five or six
consecutive days barely half what
fell here. This is the third season
that our crops have been ruined by
drought. In 1916 we had one drought
of 28 days & another of 38 days. This
year was about the same as you will
see ~~by the~~ overleaf – Since 1890 I have
kept a detail record of the days' weather & depth of frost &c

CANE END HOUSE
READING.

17 II 19

Dear Sir,

I enclose herewith my rain daily record for 1918. With reference to your remarks as to our rainfall & that of the other local recorders being different I may say that my Butler is very careful in recording & I have often during the day measured the fall after a storm & put it back into the bottle & have found that (when no further fall has taken place) that he has reported correctly.

The difference may be on account of our being on a hill about a mile from the river & that we catch storms that the other recorders do not get. One day we had a very heavy storm of nearly 2" when at Kidmore End School only about 1½ miles off they only had ·52

My land extends rather wide, and I had hay cart going on in three places one day – at one farm there was no rain & much good hay was carried, at another

Pod

The was a deluge and every thing stopped, at the third only a slight shower! When the rain is badly wanted here we often get none and a few miles off there has been plenty –

A rain guage is most useful to any one farming largely. I have a speaking tube to my bedroom and if the Bailiff reports the rainfall during the night I know what order hay or corn or land is in – ·04 to ·07 on hay or corn is nothing to trouble about, but anyone with no guage & coming down & looking out would say – Oh! rain last night – cannot carry to day! I know from experience that quantity of rain have evaporated by 10 or 11 oclk & make preparations accordingly – Some of my tenants say to my Bailiff "I cannot think how it is the Squire always seems to get his hay up all right! I used to study the weather chart in the Times & act accordingly! & having a large quantity of hands & appliances made a great rush when the bar was falling in the west & my hay was nearly fit – Other people waited to get it quite fit & carried none – Hence the remarks!

Yrs faithfully
Douglas Vanderstegen

FORM A.
BRITISH RAINFALL.

28 JAN 1914

# REGISTER OF RAINFALL IN 1913

Kept at Caversham, Rectory Road
in the County of ~~Berkshire~~ Oxford
by W. Simpson

Lat. Long.
Time of Observation
Nearest Railway Station
Diameter of Rain Gauge in.
Height of top of Gauge above Ground ft. in.
" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

# REGISTER OF RAINFALL IN 1916

FORM A.
BRITISH RAINFALL.
3 JAN 1917

Kept at Chadlington
in the County of Oxford
by Mrs F. W. Schofield
in the absence on active service of the Col.

Lat. Long.
Time of Observation 9 AM
Nearest Railway Station Charlbury
Diameter of Funnel of Rain Gauge 15 in.
Height of top of Gauge above Ground 1 ft. in.
" " " " Sea Level 450 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

# REGISTER OF RAINFALL IN 1917.

FORM A. BRITISH RAINFALL

7. JAN 1918

Kept at Cross Hill – Adderbury –

in the County of Oxford –

by Geog. H. Norris –

Lat. 52° 1' N. Long. 1° 18' W.

Time of Observation 9 A.M.

Nearest Railway Station Adderbury

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. 2 in.

" " " " Sea Level 338 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W. 1.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

W, 6,500,

---

3rd May, 1919

Dear Sirs,

Reference your letter of the 26th April I herewith return cards duly checked and you will find they have mainly been clerical errors in the additions. I have altered the Rainfall Book in consequence.

Reference your second queery the rainfall has always been entered in the book against the day in which the register was taken. This as you say is a mistake and should be entered against the previous day. On the 1st January this year no rainfall was registered. I have now made arrangements to have the rainfall shown against the previous day: that is" the rainfall of the 1st of the month to be shown against the last day of the previous month. I hope this will be quite in order ?.

Yours faithfully,
Geo. A. Kay.

FORM A2.
BRITISH RAINFALL.
23 JAN 1912

# REGISTER OF RAINFALL IN 1911

Kept at Clanfield, The Schools

in the County of Oxfordshire 2

by Mr R. C Lucas

RAIN GAUGE
Pattern
Diameter of top ........ in.
Height of top above Ground ........ ft. ........ in.
" " " Sea Level ........ ft.

Time of Observation

Nearest Railway Station
Name
Distance ........ Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A.
BRITISH RAINFALL.
25 JAN 1916

# REGISTER OF RAINFALL IN 1915

Kept at Elsfield

in the County of Oxon

by Mr. J. Parsons.

3

Lat. 51°47' Long. 1°12'
Time of Observation 10 AM
Nearest Railway Station Oxford
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. in.
" " " " Sea Level About 355 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Dear Sir

In reply to yours of the 27th inst, I have looked back and, we did not register anything on the 1st of January 1915. I am sorry to have given you the trouble of writing. Hoping this will be correct.

Yours Sincerely
J. Butler.

# REGISTER OF RAINFALL IN 1918

FORM A.
BRITISH RAINFALL.
9. 1. 19

Kept at Haseley Manor
in the County of Oxford
by F. Gelderd-Somervell

Lat. 51°41′ Long. 1°7′
Time of Observation 8. 30 a.m.
Nearest Railway Station Tiddington
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. 0 in.
" " " " Sea Level 280 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W. 1.

Jan 9 1917

To Hugh R. Mill Esq
62. Camden Square
London N.W.

attended to A

Dear Sir.

I enclose my register of rainfall for 1916. I was unable to measure the snow from Dec 12th–23rd on account of the very severe frost which made it impossible to get the top of the gauge; so I measured the total on the 23rd.

I remain Yrs faithfully
Cecil J. Twist

# REGISTER OF RAINFALL IN 1918

FORM A.
BRITISH RAINFALL.

7. 1

Kept at ~~Rotherfield~~ Rotherfield Grey's Green
in the County of Oxfordshire.
by Mr. H Wolferstan

Lat. Long.
Time of Observation 9. am.
Nearest Railway Station Henley-on-Thames.
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 2 ft. in.
" " " " Sea Level 350. ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to The Director, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Time of Observation

Nearest Railway Station
Name Kidlington
Distance 1½ m. Direction W.S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

---

Hampton Poyle Rectory
Oxford.
24th March 1917.

Dear Sir,

In the first place I must apologise to you for having left your letter for a month unanswered. I put it by intending to go into the matter, and then unfortunately overlooked it.

The date referred to – the 29th August – was while I was away for my holiday, and the observations were taken by my assistant. I have looked at her rough notes, and I see there is no error in the transcription. That there may have been a mistake is of course possible, but I have noticed that our rainfall is often very different to that of Oxford – only six miles distant – frequently I have known it to be raining there when it has been dry here, and the farm men have sometimes reported storms there and beyond that have not occurred here. I am sorry if the fault is mine.

Allow me now to express my sympathy with you in the difficulties occasioned to your work by the war.

Yours very truly
S. T. Gwilliam.

Hampton Poyle Rectory
Oxford.
12th May 1917.

Dear Sir,

In reply to your second letter, allow me to say that I shall be quite willing for you to re-vise my return for last August, as I was away at that time I cannot be quite sure of this station, but I think there was rain at Dunstable where I then was.

With many regrets for the trouble you have had in writing,

Yours very truly
S. T. Gwilliam.

# REGISTER OF RAINFALL IN 1917

FORM A.
BRITISH RAINFALL.

8 JAN 1918

Kept at Charlton Lea, Old Headington

in the County of Oxford

by L. Dawes

Lat. 51° 46' N. Long. 1° 13' W.

Time of Observation 9 a.m.

Nearest Railway Station Oxford

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. in.

" " " " Sea Level 300 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W. 1.

# REGISTER OF RAINFALL IN 1917.

FORM A.
BRITISH RAINFALL.
3 JAN 1918

*Kept at* Gray, Harpsden, Henley-on-Thames

*in the County of* Oxford.

*by* B. E. Dunbar Kilburn.

Lat. 51° 30′ 45″ N Long. 0° 53′ 50″ W.
Time of Observation 9. a.m.
Nearest Railway Station Shiplake G. W. R.
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground – ft. 8 in.
" " " " Sea Level 230 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W. 1.

Height gauge

No change

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to The Superintendent, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

**Records taken in Millimetres should not be entered on this form.**

Janry. 1st 1915

Dear Sir,

Will you please be good enough to send me any literature of a circular nature in connection with the rain fall Association?

It may interest you to know that in my garden at this address the rainfall for Dec. was 6.48 and the total for the year 27.28

I am

Yours faithfully,

A. Edward Hobbs.

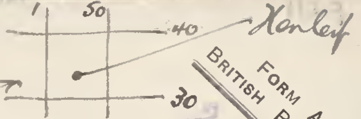
# REGISTER OF RAINFALL IN 1916

FORM A. BRITISH RAINFALL.

2 JAN 1917



Kept at 28 Hart Street Henley on Thames
in the County of Oxford
by A. Edward. Hobbs

Lat. Long.
Time of Observation 9. A.M.
Nearest Railway Station Henley (5 min walk)
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. 6 in.
" " " " Sea Level 110 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

BRITISH RAINFALL.

0 JAN 1918

# REGISTER OF RAINFALL IN 1917

cnd for anth

Kept at Lyneham

in the County of Oxford

by Reginald de Mohun Pratt

Lat. ________ Long. ________

Time of Observation 9 AM

Nearest Railway Station 2 M

Diameter of Funnel of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. 7 in.

" " " " Sea Level 351 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W. 1.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

27 FEB 1917

Dear Sir

In answer to your letter of the 24th I beg to say there is an error on the 29th & the 30th of August last I give herewith the three last wet days of August on the
27th 0.65 – 29th 0.65 – 30th 0.16
the amount of rain was the same on both dates 27th & 29th.
I am sorry to give you such trouble

Yours Faithfully
C. E. Munday

Dear Sir

I fear there is a mistake somewhere or my letters have been mislaid. This is the third account I have sent you ~~in a~~ the first being about six weeks ago.

Yours truly
C. C. [illegible]

# BRITISH RAINFALL ORGANIZATION.

## SECOND APPLICATION FOR RETURNS.

---

62, Camden Square,
London, N.W. 1.

Dr. H. R. MILL has not yet received a copy of your Rainfall observations for last year, and, as the compilation of the volume of *British Rainfall* is now approaching completion, he would feel greatly obliged if a copy of the return could be forwarded at your earliest convenience.

In case the former application failed to reach you, duplicate copies of the necessary forms are enclosed.

S. 500. iv. 17.

FORM A. 1. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

# REGISTER OF RAINFALL IN 1919.

Kept at Nuneham Park Gardens
in the County of Oxford
by C. E. Munday

Lat. Long.
Time of Observation 9 a.m.
Nearest Railway Station Culham
Diameter of Funnel of Rain Gauge 8 in.
Height of top of Gauge above Ground 3 ft. in.
" " " " Sea Level 280 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

**Records taken in Millimetres should not be entered on this form.**

FORM A2. BRITISH RAINFALL.

24 JAN 1913

# REGISTER OF RAINFALL IN 1912

Kept at Joyce Grove, Nettlebed Henley on Thames

in the County of Oxfordshire 4

by Mrs. A. Johnstone Gauge I. Gauge A.

RAIN GAUGE Pattern
Diameter of top in.
Height of top above Ground ft. in.
" " " Sea Level ft.

Time of Observation

Nearest Railway Station Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

# REGISTER OF RAINFALL IN 1912

FORM A.
BRITISH RAINFALL.

9- JAN 1913

Kept at City Waterworks Pumping Station
in the ~~County~~ City of Oxford 3
by W. H. White. Mem: Inst. C.E. City Engineer.

Lat. 51° 44' 30" Long. 1° 14' 43"
Time of Observation 8 A.M.
Nearest Railway Station G.W.Ry & L.N.W.Ry
Diameter of Rain Gauge 8 in.
Height of top of Gauge above Ground 1 ft. — in.
" " " " Sea Level 186.80 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.
no rain I believe

# REGISTER OF RAINFALL IN 1918

FORM A.
BRITISH RAINFALL.

14 2 19

Kept at Waterworks Pumping Station
in the ~~County~~ City of Oxford
by W. H. White ~~City Engineer~~.

Lat. 51° 44' 30" Long. 1° 14' 43"
Time of Observation 9 A.M.
Nearest Railway Station G. W. R. Oxford
Diameter of Funnel of Rain Gauge 8 in.
Height of top of Gauge above Ground 1 ft. - in.
" " " " Sea Level 186.80 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to THE DIRECTOR, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

FORM A.
BRITISH RAINFALL.

2 - JAN 1914

# REGISTER OF RAINFALL IN 1913

*Kept at* Rotherfield Peppard

*in the County of* Oxford 4

*by* Hubert Shears

Lat. Long.

Time of Observation 9 a.m

Nearest Railway Station Henley-on-Thames

Diameter of Rain Gauge 5 in.

Height of top of Gauge above Ground 1 ft. — in.

" " " " Sea Level 336 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Dear Sir

I send my rain record for what it is worth, but I fear the many lacunae render it practically valueless. I have to be constantly away at week ends, and they have not often been rainless this year.

Yours very truly
Hubert Shears

Dr. H. R. Mill

FORM A BRITISH RAINFALL. 2 JAN 1918

# REGISTER OF RAINFALL IN 1917

Kept at Rotherfield Peppard
in the County of Oxford
by Hubert Shears

Lat. c 51° 32′ Long. c 0° 59′ W
Time of Observation 9 a.m. (Greenwich Time)
Nearest Railway Station Henley
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground 1 ft. — in.
" " " " Sea Level c 336 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W. 1.

PEPPARD,
HENLEY-ON-THAMES.

5th January 1921

Dear Sir

I am sorry I can only send, as usual, a very imperfect record. I am generally away for week-ends the greater part of the year, and consequently often have to lump the fall for two or three days together, which I indicate by vertical lines on the register. Moreover on the 28th April, owing to my attention being diverted, I forgot to set down the fall, and have therefore marked that day with a ? I had a sort of vague recollec-

tion that the amount was ·07 in., but I am not at all certain.

I find "summer time" a great difficulty, as by 10. a.m one has generally settled down to some work and is apt to forget the gauge.

Yours faithfully
Hubert Shears

The Superintendent
British Rain Fall Organization.

made

# REGISTER OF RAINFALL IN 1912.

FORM A.
BRITISH RAINFALL.

16 JAN 1913

*Kept at* The Radcliffe Observatory,
~~in the County of~~ Oxford. 3
*by* the Staff, for the Radcliffe Observer.

Lat. 51° 46′ N Long. 0. 5. 2·6 W
Time of Observation Midnight of each Civil Day
Nearest Railway Station
Diameter of Rain Gauge 11·2 in.
Height of top of Gauge above Ground 2 ft. 4 in.
" " " " Sea Level 210 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

# REGISTER OF RAINFALL IN 1918

FORM A.
BRITISH RAINFALL.

Kept at The Radcliffe Observatory.
in the County of Oxford.
by the Staff, for the Radcliffe Observer.

Lat. 51° 46′ N Long. $0^{h}\ 5^{m}\ 26^{s}$ W
Time of Observation Midnight of each civil day.
Nearest Railway Station
Diameter of Funnel of Rain Gauge 11·2 in.
Height of top of Gauge above Ground 2 ft. 4 in.
" " " " Sea Level 210 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to THE DIRECTOR, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

FORM A2. BRITISH RAINFALL.

23 JAN 1912

1052

*Kept at* Radcliffe Observatory

*in the County of* Oxfordshire 3

*by* Dr. A. A. Rambaut, F.R.S.

W. Wickham

RAIN GAUGE: Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. 8 in.
„ „ „ Sea Level 210 ft.

Time of Observation

Nearest Railway Station: Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A. BRITISH RAINFALL. 174

27 JAN 1914 1052

# REGISTER OF RAINFALL IN 1913

*Kept at* Oxford Radcliffe Observatory

*in the County of* Oxfordshire 3

*by*

Lat. Long.

Time of Observation

Nearest Railway Station

Diameter of Rain Gauge in.

Height of top of Gauge above Ground ft. in.

" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A. BRITISH RAINFALL.

# REGISTER OF RAINFALL IN 1918

Kept at Radcliffe Observatory

in the County of Oxfordshire

by

Lat. Long.

Time of Observation

Nearest Railway Station

Diameter of Funnel of Rain Gauge in.

Height of top of Gauge above Ground ft. in.

" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W. 1.

# REGISTER OF RAINFALL IN 1912.

BRITISH RAINFALL
- JAN 1913

Kept at Sarsden Gardens.

in the County of Oxon 2

by John E. Vine

Lat. 51°54'24"N. Long. 1°34'35"W.

Time of Observation 9 a.m.

Nearest Railway Station Kingham

Diameter of Rain Gauge 5 in.

Height of top of Gauge above Ground ft. 10 in.

" " " " Sea Level 538 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

31·III·19

Sarsden Gardens.
Kingham
27/3/19.

Dear Sir.

Your letter to hand. With reference to absence of Rainfall on September 29th, On looking up my notes I find I have not any entry for that date.

I asked Mr Blair (whose Rain Gauge is about 500 yds ~~for~~ from here) he has recorded 1·14 inches for September 29th. Evidently by some means or other I failed to record it.

I very much regret giving you so much trouble

I remain.
Yours faithfully
John E. Vine.

Mr Carle Salter.

# REGISTER OF RAINFALL IN 1916

FORM A.
BRITISH RAINFALL.

*Kept at* Shenington School Gardens

*in the County of* Oxfordshire

*by* A. Blythman

Lat. Long.

Time of Observation

Nearest Railway Station

Diameter of Funnel of Rain Gauge in.

Height of top of Gauge above Ground ft. in.

" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

# REGISTER OF RAINFALL IN 1911

FORM A2.
BRITISH RAINFALL.
3 - JAN 1912

Kept at Swerford

in the County of Oxfordshire 3

by William Hall

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
,, ,, ,, Sea Level 500 ft.

Time of Observation 9 A.M.

Nearest Railway Station
Name Hook Norton
Distance 2½ miles Direction N.N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

METEOROLOGICAL SOC.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

# REGISTER OF RAINFALL IN 1916

FORM A.
BRITISH RAINFALL.

*Kept at* Pyrton Manor

*in the County of* Oxfordshire

*by* A. Buckenham

Lat. Long.

Time of Observation

Nearest Railway Station

Diameter of Funnel of Rain Gauge in.

Height of top of Gauge above Ground ft. in.

„ „ „ „ Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

# REGISTER OF RAINFALL IN 1916

FORM A.
BRITISH RAINFALL.

3 JAN 1917

Kept at The Warneford
in the County of Oxford
by Dr A. W. Neill.

Lat. Long.
Time of Observation
Nearest Railway Station
Diameter of Funnel of Rain Gauge in.
Height of top of Gauge above Ground ft. in.
" " " " Sea Level ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

# REGISTER OF RAINFALL IN 1915

FORM A.
BRITISH RAINFALL.
10 FEB 1916

*Kept at* Cokethorpe Witney

*in the County of* Oxford

*by* Capt. Guy Feilden

Lat. ........ Long. ........
Time of Observation 9 a.m.
Nearest Railway Station Witney G.W.R.
Diameter of Rain Gauge ........ in.
Height of top of Gauge above Ground ........ ft. ........ in.
" " " " Sea Level ........ ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Distance ........ Direction ........

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Form A. 1. METEOROLOGICAL OFFICE.—BRITISH RAINFALL ORGANIZATION.

936

# REGISTER OF RAINFALL IN 1920.

12 JAN 1921

Kept at WOOTTON RECTORY
in the County of Oxfordshire
by Rev. F. R. Marriott.

Lat. Long.
Time of Observation 9 am
Nearest Railway Station Woodstock
Diameter of Funnel of Rain Gauge 5 in.
Height of top of Gauge above Ground ~~1~~ ft. 9 in.
" " " " Sea Level 370 ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to The Superintendent, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

Jan. 1, following.

**Records taken in Millimetres should not be entered on this form.**
